CIMOR Implementation Team Changes

The CIMOR Implementation Team was established in 2000, to handle issues and decisions related to each division and office business requirements. Representatives were assigned for each division: Benton Goon, CPS; Gary Schanzmeyer, MRDD; Greg Riley, ADA/Director's Office/Administration; and Gary Lyndaker, OIS. These individuals have devoted numerous hours over the past five years to assuring that CIMOR will meet the department's business needs. Effective February 1, 2005, Benton Goon officially resigned from his position on the team, in order to take on full-time consultant work in another area of interest. The Division of CPS has appointed Brad Bross to replace Benton on the Implementation Team. Brad has already begun this transition, participating in team meetings, requirements sessions, and reviewing documentation. Benton will continue to be available to Brad over the next few weeks as he further transitions into this position. We welcome Brad to the team. We also wish the very best to Benton, along with our sincere gratitude for his time with us.

CIMOR Functionality

During January, the team concentrated on bug fixes and completion of SATOP and Outcomes functions. A follow-up pilot test is scheduled for late February to allow pilot testers an opportunity to review changes that were made in response to their initial review.

Functions in the next phase of development will include:

♦ Accounts Receivable
♦ Accounts Payable
♦ Security
♦ Encounter Processing
♦ Waiting List
♦ Message Management

Requirements for these areas have been reviewed with business experts, developers, and the Implementation Team in preparation for development assignments. We will begin development of this area during February.
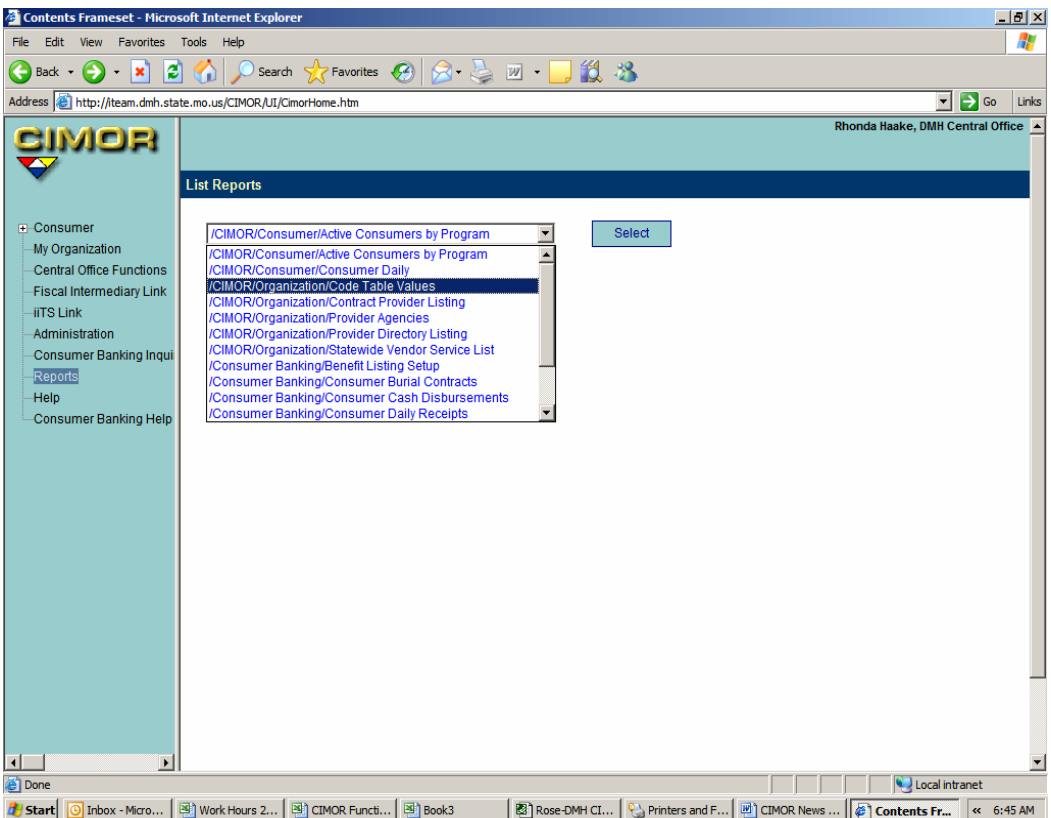

CIMOR Reports

The vision surrounding completion of the CIMOR system has from the beginning included the availability of reports (hence the "R" in CIMOR). As phases of development have been completed, the OIS Decision Support Reporting team has worked to produce various reports related to those phases. Over 150 reports were identified by a Report Workgroup that was established early in the CIMOR planning process. Priority is being placed on report designs that were determined necessary for access immediately upon CIMOR use. These reports include the following:

♦ Code Table Values
♦ Statewide Provider Agencies
♦ Statewide List of Vendors by Service
♦ Statewide Contract Provider Listing
♦ Consumer Daily List
♦ Consumer Face Sheet

♦ Active Consumers by Program
♦ Aging Report by Payer & Plan
♦ Consumers by Episode of Care
♦ Case Manager Caseload List
♦ SCL Funding Authorization
♦ Elopements Report
♦ Community Residential Monthly Authorized Services

SATOP and Outcomes reports are also being developed as those functions are completed. Several additional reports were designed that will be needed one month or three months following implementation.

Reports will be easily accessed through the CIMOR Main Menu-Reports option, as shown in the screen below:

The list of available reports will continue to increase as CIMOR is developed and beyond implementation. We anticipate there will always be a need for new reports that are useful to a number of DMH staff, and we plan to continue a coordinated effort in providing the reports and access to data that is necessary for staff to perform their jobs.
